Mines and Mining Stocks

DEMIJOHN CO

pany to operate the Lucky Boy group in the Highland district, about four miles distant from the Demijohn group. The proposition was carried unanimously. Concerning the details of the plan decided upon, one of the officials of the Demijohn company said:

"The Demijohn Mining company will receive the same number of shares in the new company as there are shares of the Demijohn stock outstanding at this date, and the same will be divided among the stockholders in the Demijohn company, share for share. The new company will take over a group of six claims in the Highland mining district, near Pioche, with a guarantee in advance of a sale of its treasury stock sufficient to develop the ground at least 300 feet in depth. Although there has been comparatively little work done on the Lucky Boy group, it already shows considerable ore of a marketable quality. It is a near neighbor of the Mendha and Milwaukee properties.

"For the purpose of distributing stock in the new company to stockholders in the Demijohn company, the latter will close its books on March 14. On that date stock will be issued to stockholders as their names appear on the books of the Demijohn company, and in the amounts shown on the books.'

There was represented at the meeting almost 500,000 shares out of 576,000 shares issued. The result of yesterday's action is expected to relieve the Demijohn Mining company of the burden of carrying the expense of developing the Lucky Boy group, and will permit larger and more satisfactory development of the Demijohn company's own

Recent disclosures in the Demijohn have been of a most encouraging kind. Splendid shipping ore has been opened up and the prospects for making a fine producer of it during the present year could hardly be better than they are.

TREWEEK-KING COALITION CASE DELAYED A MONTH

According to the rules of procedure, the Silver King Coalition company Colonel Nicholas Treweek against the Yankee . its answer in the case cor pany on Monday next, as the sixty days' time will then have expired. Colonel Treweek stated yesterday, however, answer to a query on the subject, that at the request of defendant company's attorneys, thirty days' additional time had been agreed to. 'A little progress has been made in

the matter, however," said the colonel, "as John M. Daugherty, who was made a party defendant on account of his holding a trust deed on the property in which I have alleged the King com-Colorado—300 at 3.30; 100 at 3.35; 600 at a pany has been mining, has prepared his answer. If it has not already been filed, with the court, it is ready to be filed. In it Mr. Daugherty disclaims all interest in the suit, other than as I have terest in the suit, other than as I have a colorado—300 at 3.30; 100 at 3.35; 600 at 3.45; 600 at 3.45; 100 at 3. stated, and is therefore eliminated from the action, which is now to be a straight fight between myself and the Silver King Coalition company,"

An effort was made to get Mr. Tre-An effort was made to get Mr. Treweek to discuss conditions at the Wabash company's property, which was inspected by him and Mr. Daugherty previous to the latter's departure for Butte Tuesday night, but he declined to stand for an interview. He said the mine was being opened up as rapidly as possible. sible; that he would soon have room in which to work a greater number of men, but farther than that he declined to go at this time.

MINING STOCK EXCHANGE.

No Market in the World Can Hold a Candle to This One.

Salt Lake enjoys the distinction of having the livel'est and strongest stock market in the world. Uncertainty, fear and duliness characterize trading on every other exchange that makes public its transactions. Here we have a bull market with a volume of business that compares with the times previous to the fi pares with the times previous to the fiancial set-back.

Just as has been the case with every bull movement started on the local ex-change during the past eight or ten years, Tintic stocks have started the ball rolling, and, as has usually been the case, start is made at a time when dullness and timidity are characterizing trading elsewhere. It shows that the rules gov-erning conditions in other parts of the

country or the world have nothing at all to do with the action of stocks here. The belief has been growing for some time that stocks were too low, and, fearing that a sudden rise would find the professionals in control, the public has been gradually taking on stocks for a few weeks past until now everybody seems to be getting into the game.

The pace seems too swift to last. Conditions cannot be said to be ripe for a substantial and lasting advance, and the

tarking the dividing lines of the Mala- in view of an uncertain selling market. hite and Mason Valley company's mines. In addition to the photographs a splendid map of the Malachite and the chief neighboring properties, inluding the Mason Valley group on the orth and the property of the Western Nevada Copper company, adjoining on he south. The McConnell group, the sh property and Captain J. R. De Lanar's famous Bluestone, as well as the erington Consolidated, are all shown the map and, at variance with usual astom in making such reports, it is oted that most complimentary refernce is made to some of the neighbors the company issuing the report. The subject matter of the report is ompiled and signed by S. M. Levy, chief expert and engineer of the lational Development company, and very breath uttered and every figure iven may be relied upon as being as early correct as it is possible for a empetent, conscientious man to give. lo pictures of fabulous wealth are rawn in this report, but there is sub-tance and a ring of honesty in every paragraph that makes the report appeal to the reader as a plain statement f fact. It is a document that will how shareholders in the company just xactly what their property is, and it vill also prove a general enlightener

n the district in which the mines are It is not the purpose here to review contents of this report, but, in assing, it may be said that coursing hrough the company's ground are the reat ledges that are relied upon to nake the biggest mines in the Yering-on copper region. These ledges run outh from the Bluestone and the Maon Valley into the Malachite, and nen southwesterly into the Western evada. The Bluestone and the Maon Valley are both counted as great nines already, and the Malachite is unning close up to the Mason Valley, ith a prospect that it will prove fully

Reduced Dividend Announcement Causes Decline of \$49 a Share in One Call.

Boston, March 4.- The directors of the Calumet & Hecla Mining company

Turned Over to a New Company.

The pace seems too swift to last. Conditions cannot be said to be ripe for a substantial and lastifing advance, and the best brokers in the business believe that caution should be exercised. Few of the mines are paying dividends because only a few of them are attempting, as yet, to market ores. Most of them are still running short-handed and the expectation is that they will continue so to do until the metals are considerably higher than the shareholders of the Pioche Demijohn Mining company was held in this city yesterday. The meeting was held for the purpose of voting on a proposition to separate the jwo groups of claims owned by the company and to authorize the incorporation of a new company to operate the Lucky Boy group in the Highland district, about four willes district, about four will a district on the first of the market frew of the result of the calumet & Hecla Mining company to dought declared a qu pared by S. M. Levy.

One of the directors of the company had very little copper on hand, and even sales for that little were slow. He declared that copper could not be produced in America in sufficient quantities at 13 cents a pound to satisfy the demand. Since the price of copper declined below 13 cents a pound some weeks ago, the Calumet & Hecla company had practically withdrawn from the market.

The corresponding dividend a year showing the surface improvements is showing the surface improvements in terly dividend of \$10.

One of the directors of the company had very little copper on hand, and even sales for that little were slow. He declared that copper could not be produced in America in sufficient quantities at 13 cents a pound to satisfy the demand. Since the price of copper declined below 13 cents a pound some weeks ago, the Calumet & Hecla company had practically withdrawn from the market comment of Paine, Weber & Co., Boston, together with the range of prices of copper stock and other Boston listings in which the west is interested, as well as a similar report on New York curb transactions, by James A. Pollock & Co., and from which it is secured for use in this department of The Herald:

Boston, March 4-After a small rally this morning, stocks became weak all around. Coppers were especially so, on account of the reduction in the Calumet & Hecla dividend, which was unfavorably received. Most of the selling came from showing the surface improvements in the corresponding dividend a year.

showing the surface improvements, including hoisting works, shops, boarding houses, machinery, etc. The surface appearance of the ground covered by the claims, together with the encluding hoisting works, shops, boarding houses, machinery, etc. The surface appearance of the ground covered by the claims, together with the end adrop of \$49 from the last sale at \$650, a drop of \$49 from the last sale at \$650, rances of tunnels, etc., is perfectly and \$31 from yesterday's closing bid. It isplayed, while markings show the is understood that the reaction in divourse of the ledges and the posts idend was made as a conservative ster

NEW HOISTING WORKS NORTH OF SEVEN TROUGHS ing in New York, is on his way back,

Harvey Watts, now acting in the capacity of manager at the Eclipse property, a mile north of Seven Troughs, received a letter this week from the tional rise in the tin market this aftcompany headquarters at Salt Lake to ernoon, on receipt of the news that the Dutch sales for the remainder of the line hoist for the main company work-

ing was 129 pounds 10 shillings. Prices then bounded up in a sensational manner and the market closed at 136 pounds, an advance of 7 pounds 10 shillings over a advance of 8 pounds 10 shillings over a advance of raise. The construction of this upraise is greatly facilitated by the easy exit from the directorate of the company, of the material through the tunnels. It his many other interests demanding his will give a shaft with a depth of 150 entire attention." feet and will afford an opportunity for the new machinery to assist in sinking to greater depthh, which will be done the new machinery to assist in sinking to greater depthh, which will be done as soon as the hoist is installed. It and three from the Taylor & Brunton the northwest, with headquarters at Sewill also furnish direct connections with sampling works were reported as having the extensive drifts and crosscute from the property of the northwest, with headquarters at Sewill also furnish direct connections with the extensive drifts and crosscute from the Pioneer and three from the Pio er tunnel level. Of this proposed incline shaft, all is completed by means of winzes except the portion of ground between the upper tunnel and the state of the winzes are tunnel and the winzes are tun

The proposed hoist is the outcome of the very favorable conditions revealed by the workings from the lower winze. Here drifts and crosscuts have exposed over twenty feet of good milling ore and a streak of \$100 rock next to the hanging wall. A long crosscut to the east is now nearing the contact between the porphyry and rhyolite where some time ago near the surface picture rock was taken as rich as any yet found on the Eclipse.

To the proposed hoist is the outcome of trip to the coast yesterday morning.

S. M. Levy, the National Development company's field expert, wired from Golcomba. Visit of the was about to leave for the Gold Circle district. He had been at Rawhide,

on the Eclipse.

Conditions on the Eclipse leases are very encouraging. A few days ago rock was encountered in the Lynch lease that showed values from \$400 to \$600, taken from the vein at a depth of about 80 feet. At about the same depth in the Krautz & Irving lease, the appearance Krautz & Irving lease, the appearance of a splendid character of vein matter showing values and rapid improve-ment leads the management to believe it is nearing a rich ore shoot.

Ore and Bullion. Ore and bullion settlements in this city yesterday, as reported by McCornick & Co., amounted to \$75,000, as follows: Silver, lead. gold and copper ores, \$20,000; base builion, \$45,000.

OPERATIONS AT THE MONTGOMERY-SHOSHONE

The changes being made at the Sho shone mill are rapidly nearing com-pletion and it is thought that the mill will be ready to run by the middle of next week, says the Bullfrog Miner. The clean-up from the plates when they were taken out yielded 1,000 ounces of gold bullion. This was shipped to New York Tuesday.

A shipment of 10,000 ounces of gold and silver bullion from the cyanide precipitates will be made Monday to the Selby smelter.

Development at the mine continues as usual, and the customary daily car of ore is being shipped to the smelter. Superintendent Bryce Turner, who attended the annual stockholders' meetand is expected here tomorrow.
